

# HOW TO USE A SNUFFLE MAT

**Does your pet eat all their food at mealtimes super quick?**

Then a snuffle mat is the device for you!

A snuffle mat acts to slow down a pet's feeding time by allowing the pet to 'snuffle' through the mat, picking up bits of food as they go.

Snuffle mats have been proven to slow down feeding by up to 10 times!

## WHAT IS A SNUFFLEMAT?

A snuffle mat is an oversized mat, that comprises of fleece strips tied to a rubber mat.

Snuffle mats are a form of brain game that encourage your dog to use their noses to find food. They can be used with dry treats for training or at feeding times with your pet's normal (dry) food.

Simply spread their food (dry) within the folds of the snuffle mat and let your pet 'snuffle' them out. Snuffle mats will need to be taken away as soon as feeding has finished.
